

Dear District 3 Executive Board,

With gratitude and dedication, Ray Braswell High School would like to formally submit our application to be the Spring Conference Host school for Spring 2027 with the theme “Minecraft: Building Blocks of Leadership.” We believe that Braswell High School is the perfect candidate school to foster an environment that encourages learning, connection, and leadership.

Braswell High School has the proper amenities to comfortably host well over a thousand students. We have a large auditorium, large gyms, and a multitude of spacious classrooms to host breakout sessions. Our cafeteria can hold a maximum capacity of 1255 people, and our auditorium can accommodate up to 915 people. Additionally, Braswell has the technology to livestream footage from the auditorium into the cafeteria and lecture hall, which effectively makes space for overflow. Hosting a conference to over one thousand students can be made easy with Braswell’s excellent facilities.

Our Student Council has consistently shown determination, adaptability, and leadership throughout our projects. We have hosted multiple dances, with homecoming exceeding a thousand students, and have hosted project adoption. We have also hosted many social events among our student council to strengthen our community. In addition, we have won sweepstakes for three years in a row. Our team is incredibly well-versed in the preparation that needs to be done to have a successful conference.

If given the opportunity, Braswell High School will make this the best spring conference you’ve had yet. Thank you for your consideration, and thank you for the continued support of our leaders!

Sincerely,
Braswell High School Student Council
