

# AZLE HIGH SCHOOL

1200 BOYD ROAD \* AZLE, TEXAS 76020 \* (817) 444-5555 \* FAX (817) 444-8884

To Whom It May Concern:

The Azle High School Student Council is seeking donations for assistance in hosting the spring conference for the 2016 Texas Association of Student Councils (TASC) District three, which is comprised of student councils in the Dallas/Fort Worth area and surrounding counties, on February 27<sup>th</sup>.

This one-day conference involves activities and speakers that will inspire young student leaders to make a difference in their schools and community. While attending this conference, students will have the opportunity to participate and lead projects geared to promoting school and community pride, opening students' eyes to new experiences they would otherwise not be exposed to, and providing a way to form connections with other schools in the DFW area.

Our theme for the conference is "Operation StuCo". Typically, while at a conference, students would listen to project after project, but they would not always retain ideas they just heard. Students learn and perform better when they are allowed to be more hands on; therefore, our goal is to have students actually perform many different projects and operations the day of, so they many experience projects for themselves rather than just listening to an individual describe the project.

**The mission of TASC is to promote, develop, and empower successful student councils in secondary schools in Texas.**

One such project will be a mock soup kitchen. Students will be given the opportunity to experience a meal that someone less fortunate than them might experience. There will be two meal options that day. One will be Chick-fil-A, and the other, the soup kitchen. For every student that chooses the soup kitchen meal, the monetary difference in the two options will be collected, and one large donation will be given to a local food bank. Students will not only be exposed to a different viewpoint, but at the same time, will be giving back.

Our other major project is "Operation BeYOUtiful". This project is designed to encourage students to realize their own self-worth, as well as to promote being an individual. We plan on designating areas for students to "tweet" out compliments in the hallways as well as covering windows and mirrors with positive messages.

In order for this conference to be a major success, we need various items and food to be donated. A list is located on the second page.

All those who donate will have their name displayed in the "thank you" portion of our program.

Thank you for your time and donation in advance.

Sincerely,

Kelbi Padilla  
AHS Conference Coordinator  
Student Chair

Chad Cooke
